

THE CHAMPION CHRONICLE

VOLUME 17

CHAMPION, (Alberta) THURSDAY, August 16, 1935

NUMBER 18

Jock's Waggin' Tongue

Vol. 1 Thursday, August 15, 1935 No. 14

Published in the interest of the residents of Champion and District.

They just will come back and buy where they got satisfaction as well as service. Jack Hewerton took his seventh McGraw tractor the other day and says that if this is as good as six he will probably be back No. 8 some day.

Wm. Penn and North Star Oils and Greases "Still the Best".

The new Phil o Electric Radios are now on display, come in and hear a real radio.

A real buy in a Power Flyer at \$75.00.

Fly season is here, purchase light fly time and save money at our prices.

Stately ball club is apparently having trouble to win the Arcade Cup and to give this way from Champion.

Tractor parts and fun Hostess - "You know me, Pumpkins, Win I've heard a great deal and honest go pumpkins about you."

Monday Anderson seems to have had the idea that Ruth needed company at the Hospital. But she is doing nicely now.

The Coleman Lamped is here again. \$20.00 credit for old lamps regardless of shape or kind, on a new Instant Light Gas Lamp or Oil Lamp.

Hill Hozart brought in a real nice bunch of pure Marquis heads filled right up plump with 35 and 36 kernels to the inch.

One only I. H. C. gas engine cultivator at \$44.00.

Get us check your radio for tube and battery.

Peter Holm wants a round casing with Roll or Boring. Be sure to win the Arcade Cup and to give this way from Champion.

Your guess, I give up.

Bring in your buckets, we have a real bulk gun case.

A nice assorted box of other keys just the size you require, the price is right.

"Woman is nothing but a rag, a bone, and a hunk of hair."

"Man is nothing but a rag, a bone, and a hunk of hair."

Seventeenth Annual Conference

At the seventeenth annual conference of Little Bow Constituency of A. W. I., held in the Community hall, Champion, on Wednesday, August 7th, Mrs. A. A. McQuarrie, Barons, was elected Constitutionally secretary to succeed Mrs. J. D. Hagerman, Kirkcaldy retiring officer. The seventy-five members in attendance at the conference were honored by the presence of two federal members, Mrs. J. P. Ferguson, Tootin, and Mrs. F. G. Grevett, Calgary. On the platform also were Mrs. M. L. Thompson, Coaldale, district director; Mrs. J. D. Hagerman, presiding officer and Mrs. F. G. Aleock, Champion, past district director. Following the invocation, which was given by Mrs. Aleock, an address of welcome from the mayor, Mr. J. H. Higgins, was read by the secretary, Mr. Higgins commended the Little Bow constituency for having maintained the interest of their members through their educational programs, and other activities of the organization. Mrs. J. N. Beaulieu, past provincial president, in an informal speech, made the delegates welcome to Champion as to a big family gathering. Mrs. J. Marshall, Vulcan, replied on behalf of the visiting delegates. Community singing which interpreted the reading of reports, was led by Mrs. M. L. Fodor, High Hill, accompanied by Mrs. R. C. Clements, Kirkcaldy. Vocal solos were contributed by Mrs. A. S. Roberts, Barons, Mrs. Peter Dawson and Mr. Joe McNaughton, Champion, also a musical monologue by Miss Beverly Rogers, Barons, providing pleasant intermission in the business program. Outstanding reports were given by the chairman of standing committees, especially Education and Better Schools, by Mrs. A. J. Kennedy. Mrs. Hagerman, Constitutional convener, reported interest and enthusiasm in the branches, and urged all who could to attend the district and provincial conferences. Reference was made to the Home Bureau Service, of which Miss Isabel Alexander is the newly appointed director.

Mrs. M. L. Thompson, district director, speaking on "The Power of Emotion", traced the changed conditions and the attitude of man toward womanhood from the earliest ages until she had now reached the dual goal of comradeship with equal rights. "Woman has played her part in Red Cross, Institution of Nursing, Abolition of Slavery, Child Labor and Slave, Prison Reform, the cause of Temperance, Salvation Army, etc. The future centre of power is in woman. Emotion is the ideal, and such a force cannot be checked. Woman are accepting the challenge today," said Mrs. Thompson.

Mrs. F. G. Grevett, who spoke on the high lights of the Federated convention, took her listeners in fancy on a trip to the beautiful Prince Edward Island with its historic environment.

Mrs. J. P. Ferguson, Provincial president, in a bright and entertaining address dwelt on the higher side of the Convention.

Prior to the election of officers, Mrs. Thompson presented Mrs. Hagerman, the retiring convener, with the gift of a charming little eight day clock on behalf of the con-

stituency and in token of their appreciation of her services Mrs. Hagerman feelingly expressed her thanks and her enjoyment of the three years in office.

The following chairmen of standing committees were elected for the ensuing year: Education and Better Schools—Mrs. A. J. Kennedy, Vulcan. Legislation—Mrs. J. D. Hagerman, Kirkcaldy. Agriculture and Canadian Industries—Mrs. S. B. Brown, Good Duds. House Economies—Mrs. Norman Skains, Lomond. Canadianization and Immigration—Mrs. C. Henderick, Vulcan. Child Welfare and Public Health—Mrs. J. Choate, Barons. League of Nations—Mrs. M. L. Fodor, High Hill. Crafts—Mrs. C. L. Kuykendall, Vulcan.

An interesting display of handicrafts was an exhibit under the supervision of Mrs. Ulrich and Mrs. Watkins.

Champion and Thigh Hill branches were hostesses to the delegates and visitors at tea, served in the lower hall at the conclusion of the Conference.

An invitation to meet in Vulcan next year was accepted.

Loses Car and Equipment in Forest Fire

Mr. and Mrs. Art Hopkins, Jack Hopkins and Harold Beeb had a very interesting but sad experience last week while spending a few days at Slide Lake, fishing. One morning they left their camp and went to the head of the lake and after a few hours fishing were surrounded to arrive a fire approaching which completely shut them off from their car and camp. They were forced to flee and after climbing the top of a mountain found shelter for the night at a Ranger's cabin, 9 miles from the scene of the fire. During the climb the fire was close behind. Next day they walked 13 miles to a relief camp where a friend of Mr. Hopkins transported them to Cardston. From there they were driven to their home in Champion by C. Luchin. Their car, camp equipment and clothing were completely destroyed. Upon their arrival at their home they received a telephone message from R. Harper of Lethbridge, who with his party was also camped at Slide Lake, stating that the fire had started at a cabin occupied by C. C. G. agents, who were absent, and before they were forced to abandon the scene of the camp, every effort had been made to extinguish the fire but their efforts were in vain and they were forced to depart to protect themselves.

By-Law Under

Full Discussion

A meeting was held in the Community hall on August 12th for the purpose of discussing the proposed by-law regarding the services of a Municipal doctor or doctors for the Harmony district which embraces nine townships. Councillor Long presided and outlined the proposition and explained the necessity of entering into a new contract and one that would serve the whole district in the matter of medical attention and not only those who were unable to pay for those services as under the last arrangement. Dr. Freese who has been medical officer for the town and district, for many years, explained the scheme very comprehensively and expressed his willingness to co-operate with the council in every possible way.

REWARD WHEAT

Last year our Reward wheat was degraded from No. 1 and from No. 1 Hard down to lower grades for the reason that a percentage of the kernels showed a brown or green color. This discoloration, it has been found, was caused by the Reward wheat being cut on the green side. Apparently Marquis and Carbet can be cut when slightly green. Reward, however, cannot. Farmers are recommended, therefore, to consider allowing their fields of Reward to ripen thoroughly before being cut.

Carry Off Cup

On Sunday, August 11th the Champion "Red Sox" notified to Stavely to play a double-header against that club for the Arcade cup. They were successful in winning both games and therefore in bringing home the cup. In the first game Champion won 15 to 4 and in the second game the score was 11 to 5 again in favor of the "Red Sox". Batteries for the first game were as follows: Champion—Steeves and Hargraves, Stavely—Doyle and Rae. For the second game, Champion—Walker and Hargraves, Stavely—Rae and Doyle. Champion batters were in great form as the scores would indicate, two home runs being hit by Dick Luff, one in each game. Numerous errors were made by both teams.

Enjoy the Best Tea

Nature Upsets Man's Plans

Harvest time in Western Canada has again arrived and for the next few weeks great activity, from early morning till late at night, will be the rule right across the western plains. Following several years of short crops, and in many sections complete failure of crops due to drought, and consequently lack of resources on the part of tens of thousands of farmers to seed and harvest a crop this year, governments and municipalities, banks, mortgages, loan and implement companies made provision whereby farmers were supplied with feed, fodder, seed, gas and oil, machinery repairs, under twine, and other essentials to the seeding and harvesting of a crop. Each individual farmer may not have received all that he desired, but, speaking broadly, the needs of the situation were fairly well met.

Taking the country as a whole, and excepting certain more or less restricted areas, copious rains have fallen throughout the growing season. Following a somewhat late seeding, up to a few weeks ago prospects for at least a normal, if not above normal crop, were bright. Grasshoppers and cut worms which were at first threatened, seemed to have been brought under control, whereas conditions prevailing being a main factor to the end. Prospects for a fairly large and satisfactory crop were excellent, and estimates of as high as 350,000,000 to 400,000,000 bushels of wheat were commonly made.

But last month the bright picture became clouded as rust made its appearance in the wheat fields, coming in from the southeast and spreading rapidly westward and northward. Governments, financial concerns, economic planners, farmers, every human agency is powerless against the development of Nature. For years technical agricultural experts, chemists and scientists employed by Governments have been seeking a means to offset the ravages of rust and to develop a strain of wheat that will be rust-resistant. But Nature this year has defied all their efforts, and the self-evident that Western farmers will sustain heavy losses through the effect of rusted crops.

Estimates of the loss through rust already run as high as 100,000,000 bushels of wheat, some estimates are even higher, and of course, the actual loss will not be known until the harvest is completed. On many farms, even in some municipalities, no wheat will be harvested.

There is no desire to be alarmist in reviewing this situation. Notwithstanding the inroads by rust upon what a few weeks ago was one of the most promising crops in many years, the general agricultural situation is decidedly better than for some years past. Grass again covers great areas of the West which recently presented a desert-like appearance. Food and fodder formerly lacking is now available. Garden crops are generally reported to be good. But the big cash crop of the West, wheat, will be smaller and of decidedly less value than was hoped for and expected a few weeks ago.

The whole country must face this unfortunate fact and meet it to the best of its ability. No human agency can be held responsible for the losses sustained. It was beyond Governments, corporations, and individuals alike to prevent. All will be included in the losses sustained—Governments through loss of revenues and the necessity of providing assistance where it was not anticipated it would be necessary; railways through loss of traffic and therefore loss of revenue; elevator, machine company and other employees, including farm laborers, through less employment; financial concerns to whom money for advances made is owing but which cannot be paid as fully as was anticipated; farmers more especially because the returns for their year's labor are swept away or very largely reduced. In a word, no existing political, financial, economic, or social system is responsible for the heavy losses the country is sustaining. Nature and conditions developed under its own laws.

But Nature is not always unkind. In the long run it always strikes a fair balance. Its laws operate not for one year, but throughout cycles of years. Man must not only recognize this truth, but govern himself accordingly. There is no good end to be served by becoming despondent and discouraged. There is only one courageous thing to do, and that is to face the situation and the problems presented. Losses to-day will be compensated for by gains to-morrow. There is a law of Nature. Therefore, the future should be faced with courage and determination. Life is a battle and must be fought. Man could not exist on "flowery beds of ease." If he is to succeed and reach the topmost rung of the ladder of life, he must exert himself and climb, battling with all obstructions in his way, meeting the weeds that cling and cling his steps, removing weaknesses and strengthening the ladder. Climbing he will become stronger; crouching at the foot of the ladder, waiting for somebody to carry him up, he will become feebly and weak and eventually meet with obstruction. Life is a battle and will bring confidence, is essential to success in any walk of life. And in the long run Nature will not bar the way, rather it will be found helpful and co-operating.

Wood Ready For Use

Germany Has Treatment To Season Trees While Growing

Telegraph poles, railway ties and other heavy wood necessities may be given to order by a treatment which has just been discovered in Germany. Trees are made to season themselves so that when felled their wood is ready for immediate use. A bore hole is made in the tree trunk, and a special chemical solution containing arsenic and other salts is injected into the living tree. These salts enter the sap stream of the tree, and are gradually carried to the ends of the highest branches. The tree does not survive the treatment very long, but as it dies it becomes thoroughly saturated with preservative acid and can be used on railroads or for telegraphs and telephones without any of the usual treatment.

A FASCINATING FLAVOR

Benjamin Franklin once said: "To learn the value of money, borrow it." In due time the boy at college replied: "Dear Dad, I did you goodly. Borrowed \$50 from my roommate. What do I do next?"

Serves Double Purpose

A "parachute balloon" designed to change its form in the air and to descend as a parachute, has made its first experimental flight from the field of the government dirigible factory near Moscow. The pilot, Major G. A. Lefkovich, was ordered to ascend 10,000 feet then to open the valve, permitting the gas to escape. The underpart of the bag is designed to fold upward in such a manner as the bag gradually takes the form of a parachute.

Keep cast-iron work in good condition by rubbing with blacklead.

Beer was made by the Egyptians 5,000 years ago.

Trying For New Record

Speed Of 500 M.P.H. Is Sir Malcolm Campbell's Aim

A circus of record breaking under the boiling sun on Utah's salt desert, planned as the greatest show in the history of automobile speed racing, is the September, aim of Sir Malcolm Campbell and Captain George Eyston, Britain's swiftest drivers.

The speed kings announced their plan to sail together, Sir Malcolm to shoot again at his dream of 500 miles an hour in the veteran Bluebird; Eyston to tackle every mark between that one and 24 hours.

Filled with glowing accounts of the Bonneville salt flats surface by his friend, John Cobb, who recently set 21 new records there, Campbell is confident that old Lady Bluebird, the six-ton thunder wagon that roared to the present land speed record of 276.816 on the sands of Daytona Beach last winter, finally will carry him this time over a mile in 12 seconds flat—300 miles an hour.

"I'm sure I'll beat 300 in 12 seconds," Campbell said. "Then I'll chuck racing and stick to business."

The 50-year-old Englishman who has no challenger to-day for speed over a measured mile has made a few alterations in the Bluebird since his return from Florida.

Captain Eyston, who in the past nine years has set 200 records, more than any other living man, will alternate record tries with Campbell. Eyston will drive a fearsome looking front-drive juggernaut, powered with a 400-horsepower Rolls Royce aviation engine. Its tanks carry 40 gallons of gasoline, giving it a 500-mile range without refueling. Eyston believes he can average 160 miles an hour or higher, for 24 hours and is bringing Albert Denly along to drive relief.

Fingerprints By Radio

Experiments Have Shown Great Improvement In Results Obtained

Transmission of fingerprints by radio is the latest link in the chain of criminal detection—a link that is being more strongly forged by Scotland Yard every day.

Experiments were begun several months ago. Although not yet regarded as an every day practical business, considerable improvement has recently been made in the results obtained.

At first the images were blurred, even when sent from enlarged prints, but greater technical experience is gradually overcoming this drawback. The time is very near when in urgent cases, portable apparatus will be used to transmit fingerprints direct from the scene of the crime to Scotland Yard records, it was predicted.

The technique of wired and radio transmission improves. It will be possible to send life-size fingerprint photographs speedily over any wire or radio line. Believe it or not, Scotland Yard rapidly turns new scientific inventions to its own use in the fight against criminals. The men of the famed investigating department, Lord Trenchard, has had much to do with the reorganization plan.

Demand For Homespun

Women In Quebec Are Kept Busy Spinning Yarn

Spinning wheels and hand looms in the district around Murray Bay, Quebec, are kept busy as the housewives try to fill demands of the fashionable world for homespun fabrics.

For years Murray Bay has been famous as the home of homespun. Its fine, soft blankets and candlewick spreads have been carried away by tourists to far parts of Canada. The United States and Great Britain were ordered to ascend 10,000 feet then to open the valve, permitting the gas to escape.

Much of the charm of the new fabrics is in their natural coloring and weave. Colors are from natural vegetable dyes, the habitants women making the fabrics from beginning to end.

Though women are doing most of the buying of habitants homespun, men are also using them for sports wear.

Making Progress

"Ben," wrote a busy father, "remember Benjamin Franklin once said: 'To learn the value of money, borrow it.'"

In due time the boy at college replied: "Dear Dad, I did you goodly. Borrowed \$50 from my roommate. What do I do next?"

More than two dozen species of orchids grow wild in the regions around Chicago.

Power Of Sun Rays

Amount Of Sunburn In Sunlight Measured By Machine

Government scientists of the United States have successfully developed a machine which measures the amount of sunburn in sunlight.

Dr. W. V. Colburn, internationally famous radiation expert of the National Bureau of Standards, has perfected the machine which measures ultraviolet rays of sunlight which cause sunburn and tan the skin. The machine is known technically as a portable precision ultraviolet ray meter.

Ultraviolet rays comprise less than a thousandth of the total radiation coming from the sun, Dr. Colburn said. Yet these particular rays are strong enough to scorch the skin with only several hours exposure during the summer months. The rays also are used in treating rickets.

Tests have been made at Washington and San Juan, Puerto Rico. Both are approximately at sea level and relatively free from smoke and dust.

Dr. Colburn pointed out that altitude and flying parties were factors in measuring solar radiation.

The "tanning" of the skin, what "straw" at San Juan than in Washington at the same comparative altitudes. This conforms with other radiation studies made in the tropics which show that the sun, being directly overhead, has to send its light through less ozone in the atmosphere. Experts estimate that the sunlight reaching Washington has to travel through approximately five cent more atmosphere than at San Juan, thus absorbing more ultraviolet rays.

Other tests performed at Flagstaff, Ariz., showed less ozone in the afternoon than in the morning and thereafter a greater atmospheric transparency. Autumn was found to be more transparent than the spring, experts found.

Fog takes its share of the ultraviolet rays out of the sunlight. There is less possibility of tanning when humidity is high, it was found. Physicians are interested in the decrease of the curative value of ultraviolet rays in cases of rickets, which is practically unknown in the tropics.

The present machine screens out the ultraviolet or "tanning" rays in the sunlight and measures them quantitatively with the aid of a photo-electric cell.

Sees Market In Britain

Opportunity For Export Of Tuberculin-Free Cattle From Canada

Prevalence of bovine tuberculosis in Great Britain provides a great opportunity for Canadian cattle-breeder to develop a large market for tuberculin-free cattle. Dr. Arthur Stephenson, member of the British Medical Association touring party, said at Toronto before enjoining for Winnipeg. Dr. Stephenson is an adherent of the "Cattle Development" can be reduced. For this reason and because opinion in Great Britain is strongly in favor of taking away the herds, I believe a wonderful opportunity exists to benefit both Canadian cattle-breeder and the British people."

A Modest Samson

Native Of India Earns Nickname With His Feats

N. K. Modi of Dumka, Bihar, India, has earned for himself—with good reason—the nickname of "Samson." Here are some of the feats he has recently accomplished:

"Killed a tiger single-handed, armed only with a stick."

"Killed a buffalo by twisting its horns till its neck broke."

"Fought to flight, by himself, a gang of 40 bandits."

"Saved the life of his servant, who fell down a well. He was just in time to catch the man's left ankle with one hand as he disappeared over the edge, and he hauled him back with ease into safety."

Surplus Dairy Nations

New Zealand, Australia, Denmark, Netherlands, Canada, Italy, and Switzerland appear to be the world's surplus dairy nations. The United Kingdom is the world market, supplanted by Germany in the case of butter, by the United States, Germany and Belgium in cheese, and by a number of nations in condensed and evaporated milk.

The human eye responds to wave lengths of light from those 167 ten-millionths of an inch long, which give a sensation of violet, to those 266 ten-millionths of an inch long, which give a sensation of red.

"IT'S A DOUBLE AUTOMATIC BOOKLET only 5¢"

Chantecler CIGARETTE PAPERS

FASHION FANCIES

The King's Reach Section Of Thames Named In Honor Of Jubilee

The river Thames, so far as it runs through the metropolitan outskirts of London, is divided into a series of sections called "reaches." There is Chelsea Reach, Blackfriars Reach, Greenwich Reach, Gallions Reach and so on, but one section appeared to have escaped being named, a deficiency which has now been rectified in honor of the King's silver jubilee. This is the stretch between the Pool of London, so familiar in pictures, just west of the Tower Bridge, and Lambeth Reach, which terminates on the Houses of Parliament side of Westminster Bridge. The Port of London Authority has decided to call it "The King's Reach."

Once upon a time the Thames was named as the King's Highway than the road itself between Westminster and the Tower of London, the royal residence, St. James Palace being at one end while His Majesty often had business at the Tower—sometimes very dirty business at that. So that "The King's Reach" is an appropriate name for this important waterway. It includes London Bridge, Southwark Bridge, Blackfriars Bridge, Waterloo Bridge to Westminster, and on the shoreline are such noted places as Billings Fish Market, Cannon street railway station, St. Paul's Cathedral, Victoria Embankment, including Cleopatra's Needle, Somerset House, where wills are filed and all the births, deaths and marriages in England are registered, Charing Cross and Scotland Yard.

So it was thought happen to be in Old London and lean over the parapet somewhere between the Houses of Parliament and the Tower looking at what John Burns calls "liquid history," that part is "The King's Reach."—St. Thomas Times-Journal.

Give Address On Slang Professor Of English Says It Is "Language On Trial"

At the spring meeting of Yorkshire Dialect Society held at York-shire House, J. H. Gratton, Professor of English language and philology in Liverpool University, gave an address on slang, cant, and jargon. He said it was impossible to acquire a thorough knowledge of English without being familiar with slang and vulgarisms. Slang was language on trial, but no word was sacred and the situation in which it occurred. Cant was originally the secret language of the under-world, and he defined jargon as language unintelligible of its proper sphere. Consideration would show the absurdity of condemning slang blindly. Attempts had been made to classify it according to occupations. What he really wanted was more knowledge about the passing of sectional slang into general slang. Words which were started as slang had risen in value and become an essential part of our colloquial of literary vocabulary.

New Tower Telescope A new tower telescope, the first of its kind in England and the only large astronomical telescope in the world with optical parts made by hand, has just been dedicated and commissioned at the observatory in Oxford, England.

The liver in a human body is about seven times as large as necessary for the work the organ does.

For SPRAINS "PAIN KILLERS" "KING OF PAIN" "PAIN EXPELLER"

Put you on your feet! "PAIN KILLERS" "KING OF PAIN" "PAIN EXPELLER"

Britain Has Not Yet Decided On New Program Sir Bolton Eyres-Monsell, first Lord of the admiralty, told the House of Commons Britain's naval building program would be decided "until the results of a naval conference and programs of other powers are known."

Referring specifically to a published report that Britain plans to build a new \$700,000,000 battle fleet by 1942, he said: "No action need be taken to build a fleet of that size."

Britain, he added, has advanced a hypothetical program to the United States, Germany, France and others.

Honey As A Healer Dr. N. Zatez, a leading physician in Vienna, Austria, says honey is the best healer of wounds and superior to all ointments. He has treated several thousand cases with honey, and has not had a single failure. It soothes pain, hastens healing and acts as an antiseptic, he declares. It is also highly effective with burns and carbuncles.

Rattlesnakes add from two to three "egg" annually, and sometimes four.

Four hundred years are required by nature to build one inch of top soil, according to recent estimates.

The Champion Chronicle

L. A. STARCK
Editor and Publisher

Thursday, August 15, 1935

It is now possible to view the beautiful mountains and lake scenery of Jasper Park, Canada's largest national playground, from the air. The Hotel Department of the Canadian National Railway advises that arrangements are now in effect for this service on the Beaver, which is scheduled immediately in front of Jasper Park Lodge. From this base air excursions may be taken to Maligne Lake, Athabasca Lake, the Teton Valley and around Mount Robson, three areas containing some of the finest scenery to be found in the Canadian Rockies.

LIBERTY'S CANADIAN HALL OF FAME No. 8

Dr. Charles D. O. Roberts, post laureate of Canada, a gentle man, of gentle mind, a gentle manner and a soft, gentle touch to turn the heads of the world into the heads of the world.

He is the heart of the world because he feels the urge. He originated the modern animal story. He is a great-grandfather and doesn't show it. His clothes are dark and simple, but well-cut. He throws away the key to his home, whether it is a study or a smart apartment, as soon as he takes it. His friends move in with him. He builds stables to help crippled dogs and would go broke buying mittens for the wolf at the door. He thinks a gun is some kind of a cow. Born near Fredericton, N. B., he is now officer in Ottawa, London, New York, Toronto. Recreation is chess. Disposition reading "pulp" magazines. Occupation—making a poker name—along silver roundings.

Mr. and Mrs. G. Orr and Miss Elise Orr left last week on holidays.

Mrs. C. Williamson and Miss Ada Williamson are spending a few days visiting in Calgary.

Mrs. J. Hemstall of Calgary is visiting at the home of her sister Mrs. Chapman, her two children are returning with her.

Mrs. Gladys Anderson is making fair progress following an operation for appendicitis on Saturday evening. Miss Ruth Anderson who underwent an appendix operation on Tuesday of last week is progressing favorably.

Some people seem born to mourn. They are never so happy as when they are sad. The whole world is out of twist and nothing goes right. The Government is a grasping, grasping outfit. The churches full of the devil and the population generally is high and impossible to live with. We all have met them, this class whose whole existence is filled with woe, misery and hardship. If they have a job to do they go to it in a frame of mind that soon plays them out and when the job is finished it is of the most mediocre variety. They lament about this, that and every thing, cold the winter because it is too cold, and complain about the summer because it is too hot. It rains their umbrellas is at home, and if it is dry they have it with them. Oh, I say enough, these troubles are real, to them. They are very real too, to those who have to listen to them. It is a disease. Too, there are a lot of these people who have very little wrong with them if they only knew it, and when one compares them with others who have seen real trouble and taken it with a smile, one is tempted to give them a lift in the place where it would do the most good.

Local & General

The McLean family have returned from their motor trip to Ontario.

A rain Wednesday brought the temperature down near the freezing point.

Miss Buddy James returned to Champion after spending a holiday in Banff.

Siella Hanrahan of Starley is visiting her cousin, Dorothy Humeil this week.

All the candidates for this constituency were officially nominated on Monday.

With Harvesting operations starting Wednesday half-holidays will be discontinued.

Mrs. M. Fields returned home on Monday, after spending a month holidaying at Calgary.

Miss Bennett, of Lebridge is spending a few days visiting at the home of Mrs. F. Burland.

Miss Rhoda Campbell returned to Champion after attending summer school in Edmonton.

Dad Adams is still very energetic, he moved a small building to another by himself with the aid of a jack.

Mr. and Mrs. J. W. Murphy and Miss Murphy, of Traversburg Sunday visiting at the home of A. Stogel.

Two or three have begun cutting a heat by means of the weather, and it is expected that showers will be in the field next week.

Mr. and Mrs. W. Demont and Betty and G. Cox were Calgary visitors Monday. They were accompanied home by M. J. Moffatt.

A final meeting of parents of prospective Grade XII students will be held in the auditorium of the Champion high school on Monday, August 19th at 8:30 o'clock. A large attendance is requested.

The Staveland team put in a challenge for the Avroard cup and came over Wednesday afternoon to play for it, but Champion were able to retain it by winning both games. The score for the first was 87 and for the second 11-10.

Wanted

Two high school boys to board and room. Also one room for rent. Mrs. Art Davies.

For Sale

A 20 ft. Avery Combine, has seen three seasons and is in good condition. Reasonable price, for particulars inquire of H. H. Wellman on Fred Alder's farm.

For Sale

A good vegetable garden ready for sale, anyone wanting vegetables, should come and look this garden over. Fifteen miles east and one mile south of Champion.

Rose Hughes.

Bluebirds Defeat

Milo On Sunday

The Harmony Bluebirds journeyed to Milo on Sunday and met the local softball team in what proved to be a very interesting game. The final score was 26-11 in favor of the Bluebirds. The Bluebirds felt quite delighted with their victory as this was the first time the Milo girls had met defeat. The Barons girls will play the Bluebirds at Ferguson's next Sunday.

Experimental

Station Letter

Poultry Mite Control

This is the time of the year when mites may be a source of considerable trouble to poultry and if their ravages are not checked they cause heavy losses. The poultryman at this station stresses the need for continued vigilance during the summer season. The mites do not live on the birds during the day but will be found in the dark cracks and crevices of the drop boards, roosts and nests, from where they attack their unsuspected hosts during the night.

The method of control used and recommended at this station is to thoroughly clean the house and spray all possible hiding places with a mixture of low grade coal oil and a standard disinfectant.

If mites are present in any number the procedure should be followed every ten days until control is obtained. At this station the mites have been so completely controlled by this method that last summer it was necessary to spray only once and this summer mites have not yet appeared although a careful examination is made at least once a week. No mites have been found in the house in which the young stock is kept and this freedom from mites is maintained by thoroughly cleaning and disinfecting the house each spring and by using the young stock separate from the mature.

Bees

Honey is being extracted at the Station apiary. The Head Beekeeper, H. T. Luther, has the following suggestions to make to the amateur beekeeper regarding August operations. It is well to start about August 10th to reduce super room by removing all well capped honey and so dispose with any unnecessary supers. The bees should have sufficient room to take care of any reasonable flow of honey during August, but should not have unnecessary space that has to be kept warm. It is assumed that all colonies have strong laying queens, i.e. that the necessary requeening has already been done. It is also well to look to the preparation of the brood chamber, if colonies are to be wintered, by seeing that straight good combs are supplied and that no frames are left that have candel honey in the corners, or contain any old dried pollen.

YOU CAN'T STOP STOKING A STEAM ENGINE - SAID WRIGLEY

Interviewed and asked to what he attributed his phenomenal success, the late Mr. Wrigley, of chewing gum fame, replied, "To the consistent advertising of a good product."

"But," asked the reporter, "having captured practically the entire market, why continue to spend vast sums annually in advertising?"

Wrigley's reply illuminating. Once having raised steam in an engine, he stated, it requires continuous stoking to keep it up. Advertising stokes up business and keeps it running on a full head of steam.

This applies to YOUR business, too. Don't make a secret of your product. Tell people about it. Tell them what it does. Tell them its advantages. Tell them where to get it. Tell them through the Press and keep on telling them.

Everybody Reads Newspapers

The Chronicle Champion

VERY SPECIAL Ladies, Girls Voile Dresses

in formal Designs with Organdie trim, sizes 14 to 44. All Going at Half Price

Dark Turkish Towels Suitable for Harvest wear

per pair 25c

Ladies Cotton Hose in Sand and Gun metal shade
